FS4 () - Which deficiencies have you or your projects encountered in
current SBOM standards / specifications?

Response (x-axis categories):
- Lack of formal distribution and sharing recommendations — 5
- Others (please specify) — 4
- Ambiguous or contradictory guidance — 4
- Difficulty to verify that information in SBOMs is accurate — 4
- Too many competing standards — 4
- Lack of support for some programming languages and/or ecosystems — 3
- Incompatibilities between standards / specifications — 2
- not widely known/used/adopted — 1
- Difficulty in understanding standards / specifications — 1
- The biggest barrier is a lack of consensus on whether SBOMs actually provide value. if your SBOM says authoritatively, "we depend on FooSoft, development but — 1
- lack support for AI/ML-based software — 1
- Under-specification of standards — 1
- Some are too targeted to more dependency heavy languages. — 1
- No response — 1
- Total — 12
